2200 Fowler Ave, Suite D  
Jonesboro AR 72401  
870-268-6393 : Cell 219-1019

Installation Instructions 5-8-19

**Model RYK-SHFT Spyder Extras**  
**BILLET ALUMINUM FOOT SHIFTER GRIP FOR ALL RYKER**  
**MODELS**

**Steps needed to install your SHIFTER**

- 1.- Remove the screw from the end of the shifter.
- 2.- Next take a small screw driver and place under rubber grip and work loose. This rubber shifter pad is slightly glued to the shifter arm but it will come free. Clean off any excess glue etc. to a smooth shaft as shown.

- 3.- Install the Shifter on the shifter shaft. Then use the new Socket Head Bolt and install the bolt. The shaft at the end is tapered to a larger shaft. The shifter is designed to be tightened against the taper locking it in place. Once tightened it will remain in the location you selected.

We thank you for purchasing one of our Ryker Products. We know today the needs for accessories and we solved that demand with stylish products that compliments the design of your Ryker®!
