Installation Instructions 12-1-21

Model RYK-FLG & RYK-FLGD
RYKER SINGLE & DUAL REAR FLAG HOLDER KIT

Steps needed to install your Ryker Flag Kit.

1.- First remove your License plate. Notice the side deflectors will come off as well. Once removed take the new flag mounting side brackets as shown below and place the left as shown with the center bolts holes down and the right the same way. You only use the outside holes to mount the brackets to the Ryker with screws as shown.

2.- Next take the single or dual flag holder with the reflectors behind the flag mount plate as shown below and do this for each side.

3.- Then take the license plate while holding each reflector and use the four supplied bolts and screw them to the flag mount left & right brackets using the bolts holes in the center of each bracket.

4.- Once installed you can take the flag, remove the two socket had bolts from the bottom of the mount and then place the flag on the mount shaft as shown below. Slide the flag over to the rubber end cap. Tighten down after you have located the flag at the angle you like best. Tighten down and your flag and your flag kit is installed!

We thank you for purchasing our Ryker Accessory Kits. Today we know the needs for accessories that provide a higher level of comfort & style while riding and we have solved that demand with a stylish system that compliments the design of your Ryker®!
